Call for applicants:
University of Haifa MRI-fMRI Research Center Manager

- The University of Haifa is seeking applicants for a manager position at the recently established University of Haifa MRI-fMRI Research Center.
- The center includes a new 3T MRI system for human imaging and is situated at the university annex at Rambam Health Care Campus in Haifa.

Responsibilities

- Leading and managing the center's administrative and research support staff.
- Developing and providing support pertaining to methodology of MRI-fMRI research.
- Integrating new imaging protocols and hardware/equipment to support state-of-the-art research activities.
- Supervising the operation and maintenance of all technical equipment at the research center.
- Integrating and providing support in the use of new data analysis protocols and software.
- Developing protocols and procedures for MRI-fMRI research, including the development of training courses, safety modules and methodology workshops for students and researchers.
- Managing all research and administrative activities, including budget and communication with hardware and software vendors.
- Administration and supervision of ethics protocols, including support in the preparation and submission of Helsinki proposals by research groups working at the Center.

Requirements

- Ph.D. or M.D. in an area relevant to human brain imaging.
 - Experience in human brain MRI in either research or clinical settings.
 - Excellent operational and management skills.
 - Interest in research work, initiative and responsibility.
 - Fluency and good communication skills, in oral and written form, in Hebrew and English.
-
- The University of Haifa is committed to fair and equal opportunity employment prospects.
 - The position is a full time position (100%).

Interested applicants are encouraged to send CV and contact details of references to Dr. Roee Admon radmon@psy.haifa.ac.il
